

CONSTRUCTION NOTIFICATION

Washington Gas Project: Prince George's County and District of Columbia Reliability & Reinforcement Project PHASE 4: HARRY S TRUMAN DRIVE, LARGO, MD 20774

Project Reference Number: SPID12-P4

- As of March 1, 2022 -

Dear Neighbor,

At Washington Gas, we work every day to safely and reliably meet the energy needs of our customers. Today, natural gas is the fuel of choice for more than nine out of ten new homebuyers in the Washington, D.C., metropolitan area, and Washington Gas serves more than 1.2 million customers through the region. As our region continues to grow, expansion and rehabilitation of our existing infrastructure is critical to maintaining our natural gas distribution system. As part of the Prince George's County and District of Columbia Reliability and Reinforcement Project (PGDCRRP), Washington Gas will soon be performing work in your area. This work will not affect the natural gas service to homes or businesses.

Construction Overview – Phase 4

This phase of the project extends along Harry S. Truman Drive from White House Road to just north of New Orchard Drive in Upper Marlboro, Maryland. For this phase of the project, construction area preparation is planned to begin mid-March and construction activities are anticipated to be complete in Winter 2022 followed by restorations.

Work will typically occur Monday through Saturday, 7:00 a.m. to 7:00 p.m. with roadway work occurring Monday through Friday 9:00 a.m. to 3:00 p.m. subject to extended county-approved work hours including off peak daytime hours and overnight. Construction schedules may be affected by weather and other unforeseen circumstances. All work will be completed in accordance with permits.

What Can I Expect During Construction?

Please use caution, be alert to slow-moving vehicles entering or exiting the road and follow traffic control signs and potential flagger direction on Harry S. Truman Drive for lane closure information. Traffic controls are managed by traffic control plans approved by the Prince George's County Department of Permitting, Inspections and Enforcement (DPIE).

If you live near the construction area, you may hear construction noise during work hours, and you can expect to see Washington Gas and contractor vehicles and equipment. For your safety and the safety of construction personnel, do not cross construction barriers, enter construction areas, or approach vehicles or equipment.

Right-of-Way Clearing

For this phase of the project, roadside tree clearing is necessary and will occur in the center median along Harry S Truman Drive between White House Road to just north of New Orchard Drive. Tree clearing is performed in accordance with approved and permitted plans.

About the PGDCRRP Project

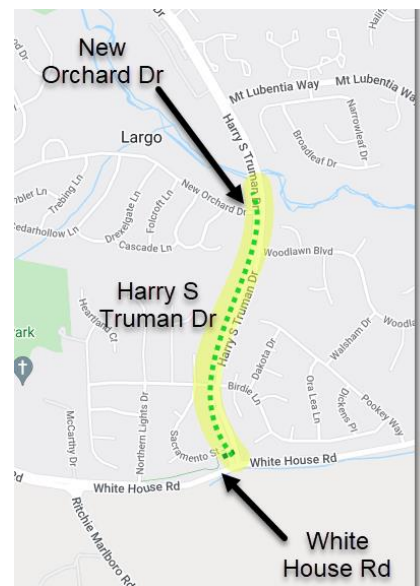

Washington Gas is constructing new infrastructure in Prince George's County and the entire region.

Built mostly in public and electric utility corridors, the project paves the way for economic growth and serving more residents with clean, affordable natural gas service.

The investment will include approximately 16 miles of coated steel, natural gas pipeline and regulating stations connecting two portions of Washington Gas' existing system.

The following map shows the approximate location and limits of this phase of the construction project:

Restoration Plans

Restoration crews will make temporary restorations immediately following completion of the construction. Permanent restorations will be made in compliance with permits and applicable local regulations and typically occur within 45 days after all work is completed, weather permitting. As part of the project, cleared trees were mitigated through a Prince George's County approved forest mitigation bank, as approved by Maryland Department of Natural Resources and Maryland National Capital Park and Planning Commission, so restoration in county right-of-way will be performed in coordination with the county.

We strive to make every reasonable effort to minimize disturbance in your community. If you have questions or need additional information about this project, please visit <http://pgcdcrpp.com> or contact the project team at pgcdcrpp@washgas.com or 703-750-5222. **Project reference number: SPID12-P4.** Thank you for your patience as our construction crews complete this important work in your community.
