

## CONSTRUCTION NOTIFICATION AND NIGHT WORK NOTICE

### Washington Gas Project: Prince George's County and District of Columbia Reliability & Reinforcement Project PHASE 7B: BRIGHTSEAT RD, LANDOVER, MD 20785

Project Reference Number: SPID12-P7B

- As of November 2, 2022 -

Dear Neighbor,

At Washington Gas, we work every day to safely and reliably meet the energy needs of our customers. Today, natural gas is the fuel of choice for more than nine out of ten new homebuyers in the Washington, D.C., metropolitan area, and Washington Gas serves more than 1.2 million customers throughout the region. As our region continues to grow, expansion and rehabilitation of our existing infrastructure is critical to maintaining our natural gas distribution system.

As part of the Prince George's County and District of Columbia Reliability and Reinforcement Project (PGDCRRP), Washington Gas will soon be performing work in your area. This work will not affect the natural gas service to homes or businesses.

#### Construction Overview – Phase 7B

Construction for this phase of the project will occur in public right-of-way and private property easements along Brightseat Road from the Library of Congress Landover Center Annex at 1701 Brightseat Road to the Landover Mall site entrance at 1713 Landover Road in Landover, Maryland.

Construction area preparation for this phase is underway with construction activities expected to begin in or near early November 2022 and be complete in late Winter 2022/2023. Work hours are 7:00 a.m. to 5:00 p.m. Monday through Saturday and may include extended county-approved work hours including off-peak daytime hours and overnight. Work may occur outside of standard work hours on occasion and only as needed. Construction schedules may be affected by weather and other unforeseen circumstances. Work is performed in accordance with permits.

#### Night Work Notice

Near the end of the project, crews may need to work 24 hours a day for periods of 1-3 days to perform system tests, and safely and efficiently connect the system.

#### How Will This Affect My Commute?

For work areas in public right-of-way, there may be long-term traffic controls with concrete barriers with gaps at intersections and temporary traffic controls including lane closures, lane shifts and flagging operations. No road closures or detours are planned. Access will be maintained. Traffic controls are managed by traffic control plans approved by the Prince George's County Department of Permitting, Inspections and Enforcement (DPIE).

Use caution, be alert to slow-moving vehicles entering or exiting the road and follow traffic control signs and potential flagger direction. If needed, traffic information updates will be posted on <http://pgcdcrp.com/news-and-media>.

#### About the PGDCRRP Project

Washington Gas is constructing new infrastructure in Prince George's County and the entire region.

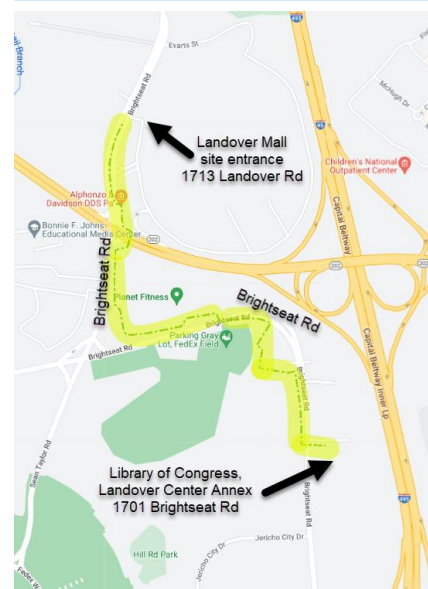

Built mostly in public and electric utility corridors, the project paves the way for economic growth and serving more residents with clean, affordable natural gas service.

The investment will include approximately 16 miles of coated steel, natural gas pipeline and regulating stations connecting two portions of Washington Gas' existing system.

The following map shows the approximate location and limits of this phase of the construction project:

### What Can I Expect During Construction?

If you live near the construction area, you may hear and feel construction activities during work hours, and you can expect to see Washington Gas and contractor vehicles and equipment. For your safety and the safety of construction personnel, do not cross construction barriers, enter construction areas, or approach vehicles or equipment.

### Right-of-Way Clearing

When roadside tree clearing is necessary, it is performed in accordance with approved and permitted plans and agreements.

### Restoration Plans

Restoration crews will make temporary restorations immediately following completion of the construction. Permanent restorations will be made in compliance with permits and applicable local regulations and typically occur within 45 days after all work is completed, weather permitting. As part of the project, cleared trees were mitigated through a Prince George's County approved forest mitigation bank, as approved by Maryland Department of Natural Resources and Maryland National Capital Park and Planning Commission.

We strive to make every reasonable effort to minimize disturbance in your community. If you have questions or need additional information about this project, please visit <http://pgcdccrp.com> or contact the project team at [pgcdccrp@washgas.com](mailto:pgcdccrp@washgas.com) or 703-750-5222. **Project reference number: SPID12-P7B.** Thank you for your patience as our construction crews complete this important work in your community.
